

Parent Observations

We welcome you to your child's classroom!! We invite you to visit the classroom to view what goes on during a typical day. This is an important step in your education of what Montessori life is like. Parent observations are to be scheduled through the front office. Recommended times for observation are 8:30-10 am for morning and full day students and 12:45-2 pm for afternoon students. When you schedule an observation, you will receive a written set of instructions regarding what you will see during the observation. Scheduling is required to ensure you make the most of your visit and no other events are planned for that time.

All observations take place in the classroom areas. Observations are not permitted through the hallway windows at any time. Please be advised, your personal observation should be scheduled when your child has adjusted to the classroom setting. We typically do not schedule any observations during the first six weeks of school. If you schedule too soon in the year, your presence could be very disruptive to your child, particularly when you leave without him/her.

We thank you for your cooperation on this matter and hope you enjoy your visit into the Montessori classroom.
